Unit2. Vocabulary

Term	Definition
Vernier caliper	High-precision measuring instrument used to measure external diameters, internal diameters, and depths.
Try square	A tool consisting of two blades set at 90°, used to check perpendicularity and draw right angles.
Scriber	A hardened steel rod with a sharp point used to mark lines on metal or plastic surfaces.
Coping saw	A saw with a U-shaped frame and a fine blade used for intricate shape cutting and curved cuts in thin wood.
Hacksaw	A fine-toothed saw mounted on a metal frame, designed for cutting metal tubes, rods, and plastic.
Jigsaw	A portable power saw with a reciprocating blade used to make straight or curved cuts in wood, metal, or plastic.
Bench vice	A holding device mounted on a workbench with two jaws to securely clamp a workpiece in place.
G-clamp (or C-clamp)	A portable holding tool shaped like a 'C' or 'F' used to hold parts firmly together or fix them to a worktable.
File	A hardened steel tool with a series of ridges used to smooth down or shape metal and plastic surfaces.
Rasp	A coarse file with raised individual triangular teeth, used specifically for rapidly shaping wood.
Orbital sander	An electric power tool that vibrates in small orbits to rapidly smooth wood surfaces with sandpaper.
Pillar drill (Drill press)	A stationary motorized drilling machine mounted on a column, used to make precise vertical holes.
Chuck	A specialized clamp on a drill that holds the drill bit securely in place.
Drill bit	A rotating cutting attachment used in a drill to create cylindrical holes in materials.
Gimlet	A small hand tool with a threaded screw tip and T-handle used for boring pilot holes in wood.
Claw hammer	A hammer featuring a flat striking face on one end and a curved claw on the other for removing nails.
Mallet	A soft-headed hammer (made of rubber, nylon, or wood) used to strike delicate parts without leaving marks.

Adjustable spanner (Wrench)	A tool with a movable jaw controlled by a worm screw to fit nuts and bolts of various sizes.
Allen key (Hex key)	An L-shaped hexagonal steel bar used to turn screws with internal hex sockets.
Soldering iron	A heated hand tool used to melt tin solder to join electrical wires and electronic components.
3D Printer (FDM)	A digital manufacturing machine that builds 3D objects by depositing melted thermoplastic filament layer by layer.
Laser cutter	A machine that uses a high-powered laser beam to cut or engrave precise shapes into thin materials.
Personal Protective Equipment (PPE)	Protective gear worn in the workshop, such as safety goggles, to protect against hazards and injury.
Safety goggles	Protective eyewear worn in the workshop to shield eyes from flying debris, chips, and sparks.
Workpiece	The piece of raw material or object currently being worked on using tools or machinery.
